Barko Peru's

Book 1851

1st
Capt Charles E Starbuck

Nantucket May 12th 1851

Dear Sir

The Owners of the Bark Penn having full confidence in your ability have appointed you to command her, on a Sperm. whale voyage and they are in hopes you may be successful in obtaining a cargo in a reasonable time.

It is not with intent to give you any positive instructions, but to give you the views of the Owners on some points, that I undertake to write to you at this time, for I am well aware that circumstances may arise that cannot be foreseen, in which events we must rely wholly on your judgement.

In the first place then we are very strong in the belief that ships sailing at this season will do better to cruise in the Atlantic 8 or 9 months than any other grounds. I think you would do well to run off pretty well to the Southwards till you strike the Eddy Current north of the Gulf Stream about N E by E from Hatteras. - Again just South of the Gulf Stream and all along in Lat 32° to 37° I believe there have been a good many whales taken, also around the Western Islands where I should advise to get a good recruit and from September to December the Aleocho Banks & from thence off Rio Janeiro, a great many whales have been seen, and in Dec Jan & February is apt to be the best weather for cruising in the Lat of River Laplata and from there to the Falkland Islands & there have been a great many good fares taken on this ground as late as April & May.

I presume you got the latitudes & longitudes where whales have been taken better than I can give them to you, but I have often heard it observed that on the coast of Brazil & Patagonia you should cruise just in the edge of green water.

Should you be successful enough to induce you to continue in the Atlantic Ocean, the Owners would have no objections to it, but this is a matter you will have to decide according to circumstances.

Should you be fortunate enough to obtain Sperm. Oil before passing the Western Islands, please ship it, or leave it at Fayal to be shipped to my address & forward bill of lading or receipt by one or more conveyance

I also wish you to ship as fast as you may have a good opportunity all the sperm oil you may take the first year out, whether from the Atlantic or Pacific, and should you be fortunate to obtain oil pretty fast and think it advisable to ship more, we shall have no objection, in all cases consign any thing you ship to Thain & Wing & Antucket, and advise us as early as possible by two different conveyances if possible.

We have fitted the ship as we think well for four years and have put on board about 30 sheets copper, that in case your ships bows begin to get ragged you can tip her and mend them.

We have no objection to prolonging the voyage as long as the ship is in good order, but we do not wish to take any risk of having her bottom eat out by worms.

Notwithstanding we have fitted for a sperm whale voyage, we recommend your taking everything you see that will make oil and when you meet with an opportunity to sell any Black Fish or other common oil, that you may have obtained at a fair price, you had better do so, at any rate if there is a chance of filling the place with sperm oil. —

At any time if you sell Black Fish or other common oil to recruit with, I recommend that you give each man his share to do with as he pleases, if you consider it safe to do so.

I shall annex an Invoice of Shop Clothes &c to supply the crew & to recruit the ship with, in the first column is the cost at wholesale and the other the price at which they are to be charged to the crew, which is lower than they would cost buying them at retail & paying Interest & Insurance on them.

I will also annex a list of articles on board with the prices here as near as I can, together with the advances made to the crew & officers for your guidance in case you have to discharge them.

Should any of your crew, or officers prove incompetent to fill the place they shipped for we shall rely on you to make the exchange stipulated for in the shipping papers & not by any means let the voyage suffer from any cause if in your power to remedy it.

I very highly approve of establishing a system of bounties for seeing Whales, and

Should recommend you to offer not less than two dollars for every whale that is obtained, to be paid as soon as she is on board and I would double that sum for every one obtained this side of Cape Horn & more if you think best.

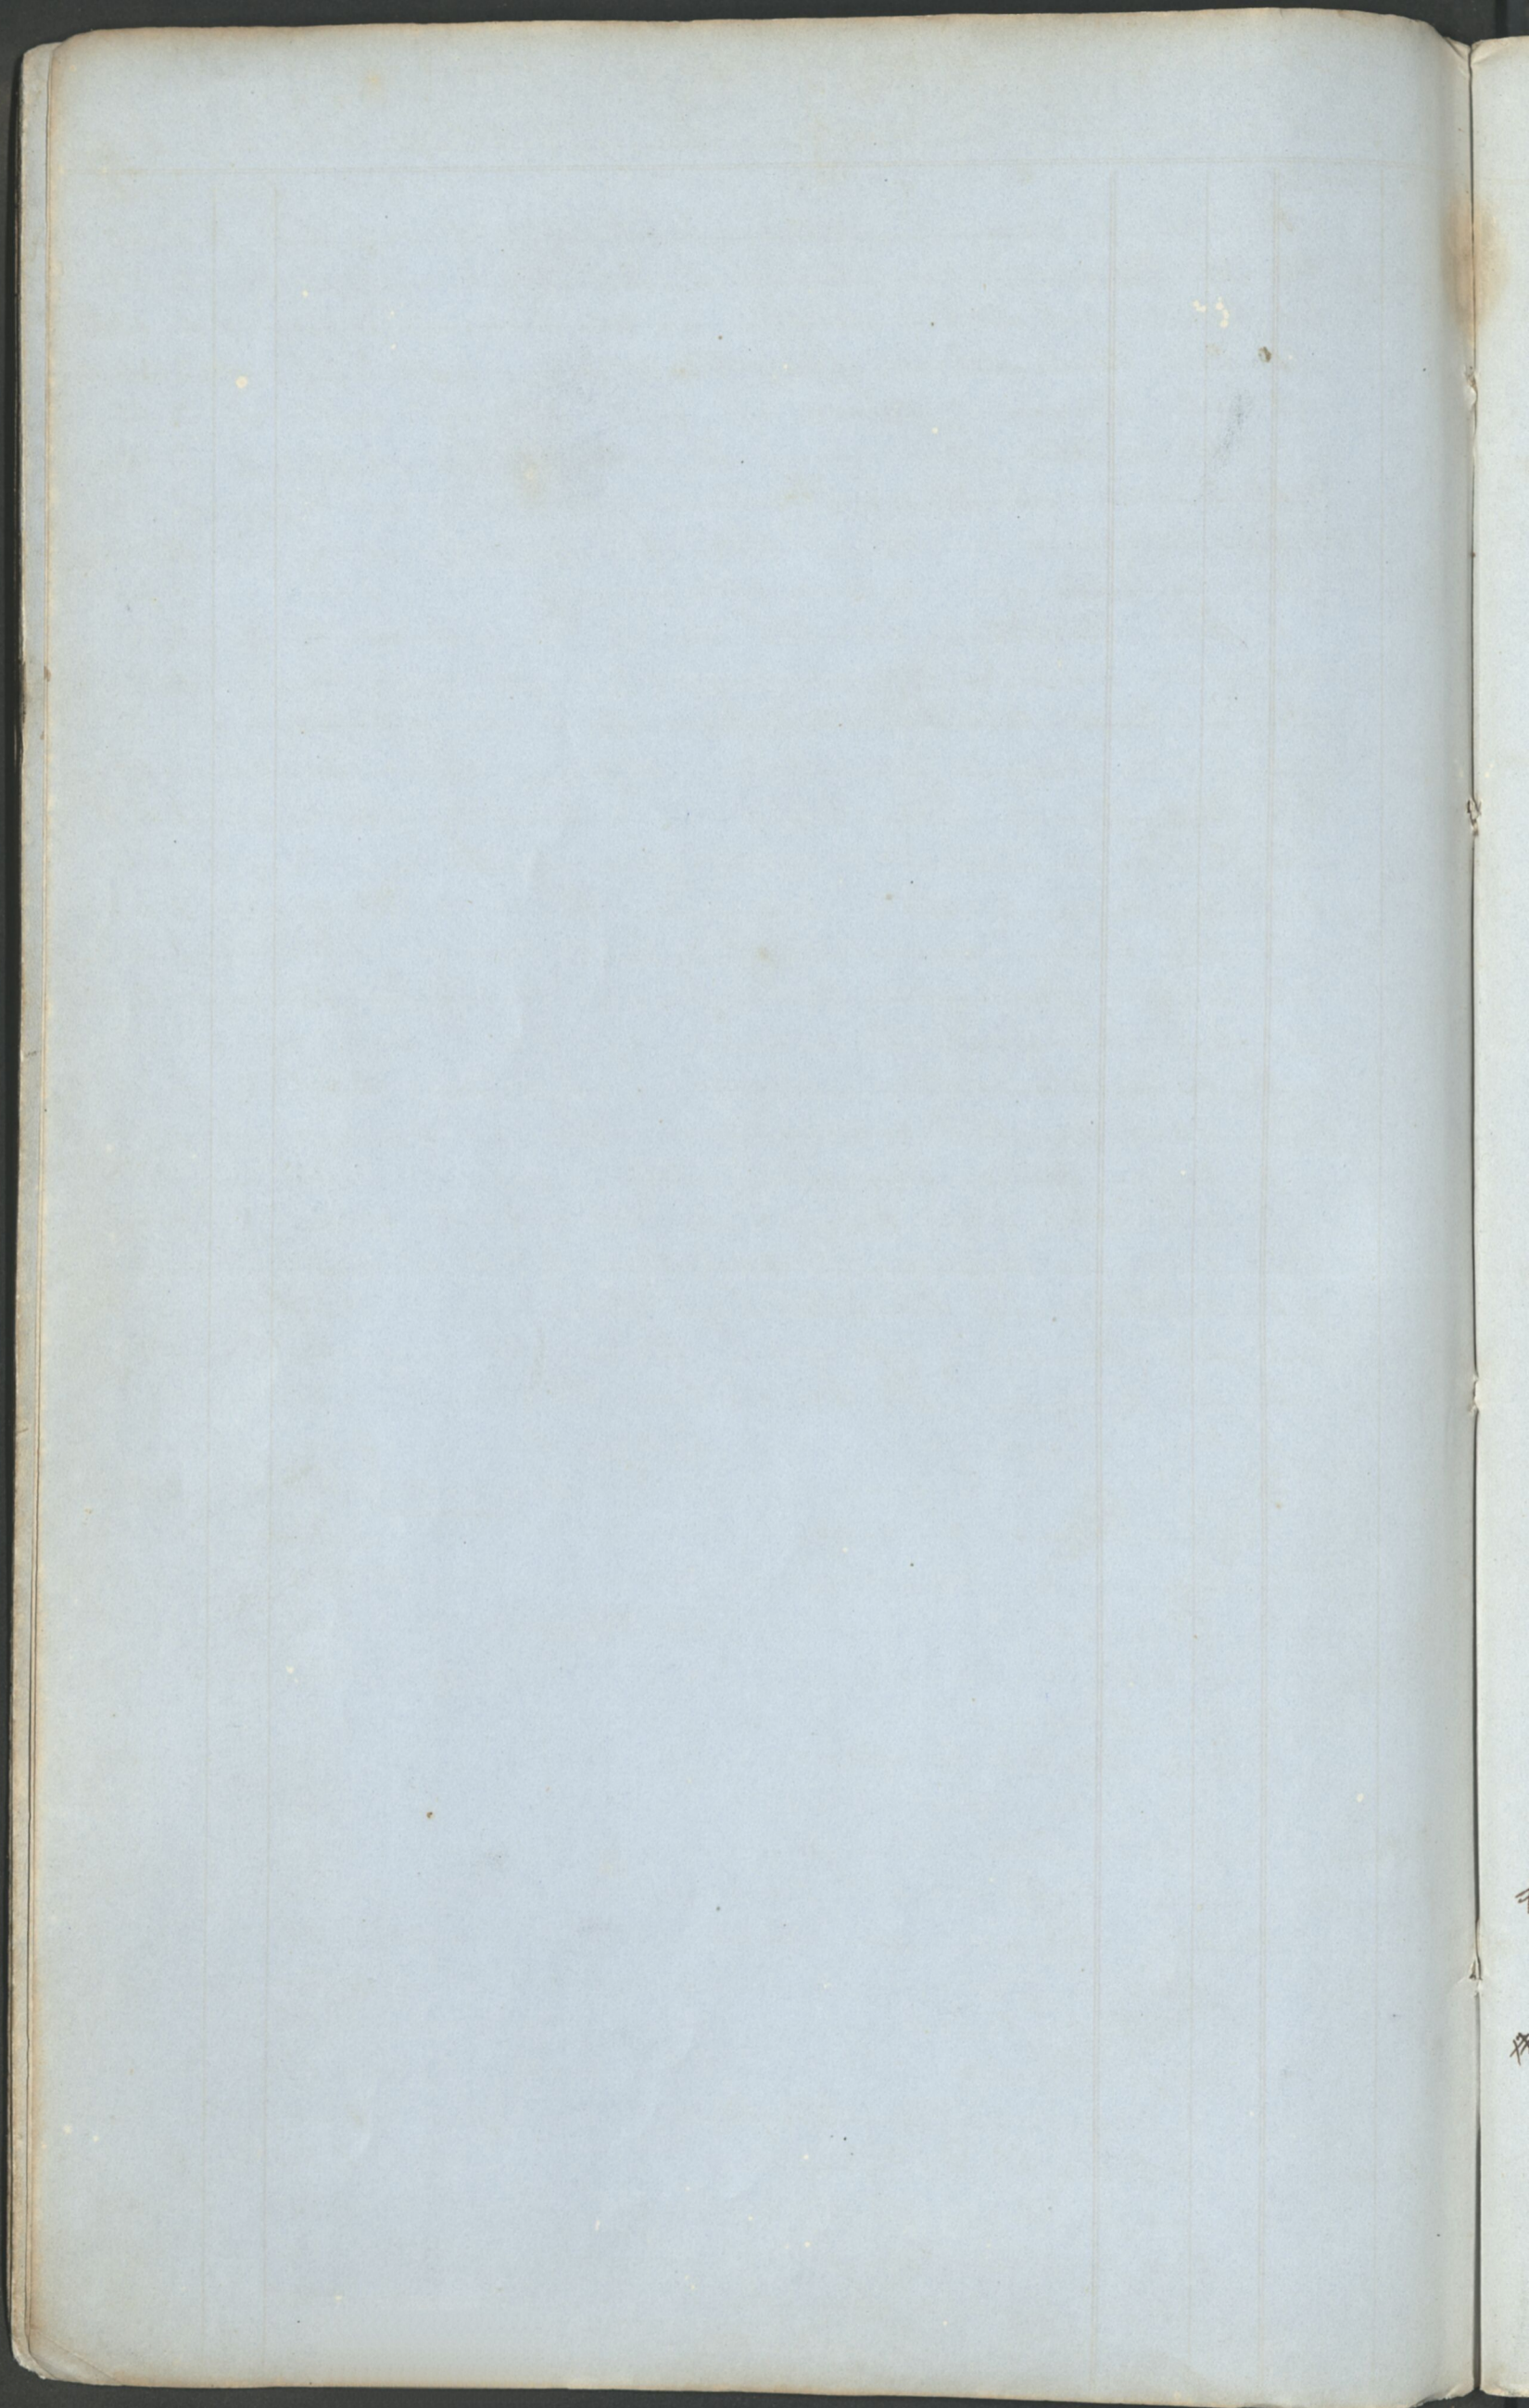

I shall give you one hundred dollars to be expended in this way and you are at liberty to expend two or three hundred more if you think you can do so advantageously.

The clothes in the cask marked X X you may make any disposition of that you may think best, either by Bounties, or otherwise.

In my opinion Spum Oil will not be less than One dollar & twenty five cents per gallon for several years to come & may be higher. We name this that you may be on your guard if you find it necessary to raise funds to recruit with, we should prefer for you to draw if you can do it more advantageously, - but excepting extraordinary cases I think you will have Common Oil enough to recruit with.

In conclusion I wish you a pleasant & prosperous voyage & I wish to remind you that it is always pleasant to have letters at all times & if you know of any other ships don't forget to mention them.

Yours
David Thain agent
